Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to Application No. 09/994,019 filed on 11/27/2001.
2. Claims 1-29 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-11, 13-18, and 20-29 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Rice, James L. III (US 20020174010) in view of Mockett, Gregory P. (US 20010037359).

As per claims 1, 3-11, 13-18, and 20-29 Rice substantially discloses a computer control software which allows for secure document delivery between remote parties, and control by the sender of the distribution and handling by the recipient of an electronic document or other computer file, the system comprising:

A distribution device for distributing distribution data containing the contents data, and a receiving device for receiving and storing the distribution data, wherein the distribution data further contains use limitation information of the distribution data (see., Rice, abstract, [0017], [0095], [0118], 0181], 0182], and [0216]). Rice fails to explicitly disclose

Art Unit: 3621

the limitation of rewriting the use information of the stored distribution. However, Mockett discloses a system for customizing access and delivery of information distributed in a packet-based network. A rewriter engine (DMLRE) for dynamically analyzing, filtering, and rewriting said information transmitted between said user computer and said destination server computer in accordance with said profile data and said user's preference (see., Mockett, abstract, [0024], [0033], [0047], [0049], [0052], and claim 2). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teachings of Rice by including the limitation detailed above as taught by Mockett because this would allow users to access or reuse data or contents that already being stored previously.

Allowable Subject Matter

5. Claims 2, 12, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
